

INSTALLATION INSTRUCTIONS

Model: **OW2400, OW2402**
Fixture Family: **SASS OUTDOOR SCNCE**
Document Description: Installation Instructions for
Sass Series Luminaires

TABLE OF CONTENTS:

- SHEET 2: MULLION SYSTEM INSTALLATION**
- SHEET 3: REMOTE DRIVER BOX INSTALLTION**
- SHEET 4: SEALING INSTRUCTIONS
(EXTERIOR INSTALLATION)**
- SHEET 5: 2 X 4 EXTERIOR JUNCTION BOX WITH
TRANSITION PLATE INSTALLATION**
- SHEET 6: 2 X 4 JUNCTION BOX INSTALLATION**
- SHEET 7: 4 X 4 EXTERIOR JUNCTION BOX WITH
TRANSITION PLATE INSTALLATION
(WITH JUNCTION BOX COVER OPTION)**
- SHEET 8: ALTERNATE JUNCTION BOX INSTALLATION
(WITH JUNCTION BOX COVER OPTION)**

! When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

MULLION SYSTEM INSTALLATION

NOTE: THIS INSTALLATION METHOD REQUIRES THE USE OF THE REMOTE DRIVER BOX. PLEASE SEE INCLUDED INSTRUCTIONS FOR INSTALLATION OF REMOTE DRIVER BOX AND ELECTRICAL CONNECTIONS TO FIXTURE THROUGH MULLION SYSTEM.

Important: Exterior installation requires caulk along perimeter of housing (or J-Box Cover). SEE SHEET 4.

1. Loosen lens retention set screws at side of housing.
2. Slide top and bottom lenses out from housing.
3. Loosen #8 socket head screws at front of wire splice box.
4. Remove fixture mounting plate.
5. Secure fixture mounting plate to aluminum mullion system with thread forming screws (by others).
6. Make electrical connections per code. (See Remote Driver Box Installation sheet 3)
7. Being careful not to pinch wires, resecure fixture housing to mounting plate with socket head screws at the front of the wire splice box. **NOTE: For proper seal, mounting plate must NOT be visible from side views. Tighten #8 socket head screws until mounting plate is not visible.**
8. Reinstall top and bottom lenses and tighten lens retention set screws at side of housing or extruded aluminum mullion seams run behind mounting plate.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

SEALING INSTRUCTIONS (Exterior installation or moisture rich environments)

Standard Cover

J-Box Cover Option

IMPORTANT: Caulk must be applied to a clean and dry surface. All surfaces must be free of debris and residue to ensure a watertight seal. Faulty or missing caulk will cause electronic failure.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

2 X 4 JUNCTION BOX INSTALLATION (Exterior 2x4 Junction box shown in illustration)

Important: Exterior installation requires caulk along perimeter of housing (or J-Box Cover). SEE SHEET 4.

1. Loosen lens retention set screws at side of housing.
2. Slide top and bottom lenses out from housing.
3. Loosen #8 set screws at front of wire splice box.
4. Remove fixture mounting plate.
5. Secure fixture mounting plate to junction box at wall with screws (by others).
6. Make electrical connections per code.
7. Being careful not to pinch wires, resecure fixture housing to mounting plate by tightening the provided #8 socket screws at the front of the wire splice box. **NOTE: For proper seal, mounting plate must NOT be visible from side views. Tighten #8 socket head screws until mounting plate is not visible.**
8. Reinstall top and bottom lenses and tighten lens retention set screws at side of housing

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

2 X 4 JUNCTION BOX INSTALLATION

Important: Exterior installation requires caulk along perimeter of housing (or J-Box Cover). SEE SHEET 4.

1. Loosen lens retention set screws at side of housing.
2. Slide top and bottom lenses out from housing.
3. Loosen #8 socket head screws at top and bottom of wire splice box.
4. Remove fixture mounting plate.
5. Secure fixture mounting plate to junction box at wall with J-Box mounting screws (by others).
6. Make electrical connections per code.
7. Being careful not to pinch wires, resecure fixture housing to mounting plate with #8 socket head screws at the front of the wire splice box. **NOTE: For proper seal, mounting plate must NOT be visible from side views. Tighten set screws until mounting plate is not visible.**

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.

ALTERNATE SIZE JUNCTION BOX INSTALLATION WITH JUNCTION BOX COVER OPTION (Exterior 4x4 Junction box with Transition Plate shown in illustration)

Important: Exterior installation requires caulk along perimeter of housing (or J-Box Cover). SEE SHEET 4.

1. Loosen lens retention set screws at side of housing.
2. Slide top and bottom lenses out from housing.
3. Loosen #8 socket head screws at top and bottom of housing.
4. Remove fixture mounting plate, junction box cover plate and junction box cover mounting plate assembly.
5. Loosen and remove provided #8 pan head fixture mounting plate screws (set to the side for reassembly later).
6. Secure junction box cover mounting plate to junction box with screws (by others).
NOTE: Verify bracket is level for fixture straightness once fixture is installed.
7. Using the provided #8 pan head fixture mounting plate screws (set to the side earlier), secure the fixture mounting plate and the junction box cover plate to the junction box cover mounting plate now attached to the junction box. The Junction box cover plate's 1/4" thick gasket will face the wall.
8. Make electrical connections per code.
9. Being careful not to pinch wires, resecure fixture housing to mounting plate by tightening the provided #8 set screws at the top and bottom of the wire splice box. **NOTE: For proper seal, mounting plate must NOT be visible from side views. Tighten set screws until mounting plate is not visible.**

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

ALTERNATE SIZE JUNCTION BOX INSTALLATION WITH JUNCTION BOX COVER OPTION (Octagon J-Box shown in illustration)

Important: Exterior installation requires caulk along perimeter of housing (or J-Box Cover). SEE SHEET 4.

1. Loosen lens retention set screws at side of housing.
2. Slide top and bottom lenses out from housing.
3. Loosen #8 socket head screws at top and bottom of housing.
4. Remove fixture mounting plate, junction box cover plate and junction box cover mounting plate assembly.
5. Loosen and remove provided #8 pan head fixture mounting plate screws (set to the side for reassembly later).
6. Secure junction box cover mounting plate to junction box with screws (by others).
NOTE: Verify bracket is level for fixture straightness once fixture is installed.
7. Using the provided #8 pan head fixture mounting plate screws (set to the side earlier), secure the fixture mounting plate and the junction box cover plate to the junction box cover mounting plate now attached to the junction box. The Junction box cover plate's 1/4" thick gasket will face the wall.
8. Make electrical connections per code.
9. Being careful not to pinch wires, resecure fixture housing to mounting plate by tightening the provided #8 set screws at the top and bottom of the wire splice box. **NOTE: For proper seal, mounting plate must NOT be visible from side views. Tighten set screws until mounting plate is not visible.**

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
