## SHIPPING NOTES-

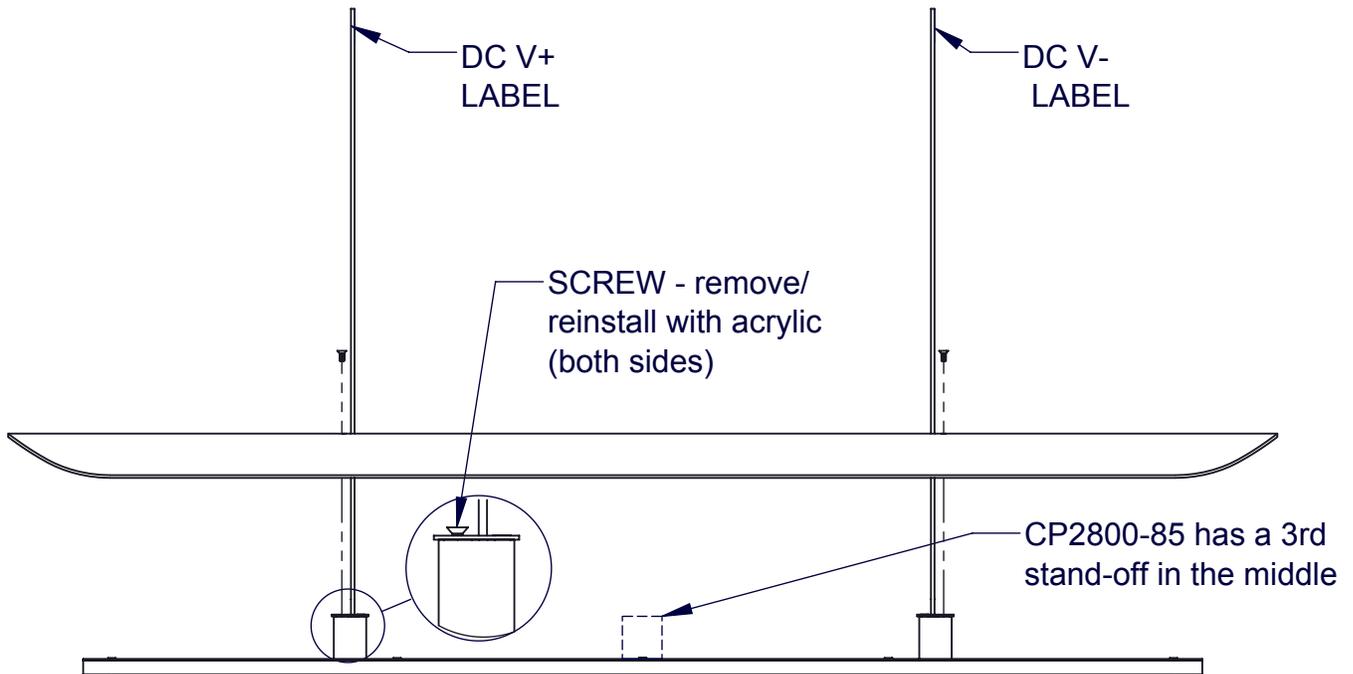

Each order will be bulk shipped in 3-4 sub-assemblies:

1. LED assembly
2. Curved Acrylic
3. Canopy
4. Remote driver box (if ordered)

## INSTALL CURVED ACRYLIC TO LED ASSEMBLY-

1. Remove the flat head screws from the LED assembly. These will be used to install the acrylic.
2. Pull power cords through holes closest to the center of the acrylic.
3. Install the two flat head screws into outside holes near power cord to secure curved acrylic.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

## RMD (Remote Mounted Driver) Option- Canopy Mounting

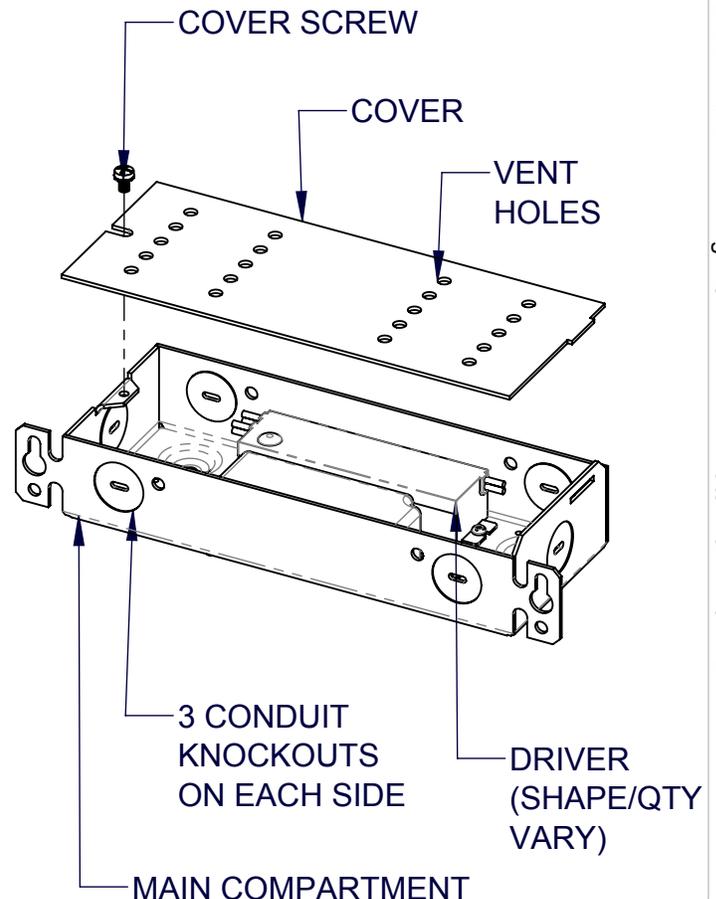

1. Two of the below canopies/fixture. A single conductor power cord is used. V+ on one side and V- on the other.
2. Fasten the mounting plate to the junction box with the junction box mounting screws (by others).
3. Feed the power cord through the center of the canopy cover and into the power cord clamp. Tighten the screws on the power cord clamp to hold the fixture up. Adjust the height of the fixture and make sure it is level.
4. Make all wire connections per local and national codes.
5. Lift Canopy cover in place and secure with canopy screws.
6. Tighten the set screw in the middle of the canopy cover for extra security.

## RMD (Remote Mounted Driver) Option- Driver Box Mounting

Components may vary depending on options ordered.

1. Remove cover by removing the cover screw.
2. Mount remote box in an accessible area per local and national codes, use fasteners appropriate for the mounting surface (not included).
3. Make all wire connections per local and national codes.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

## Canopy Parts

Ba - Canopy Kit

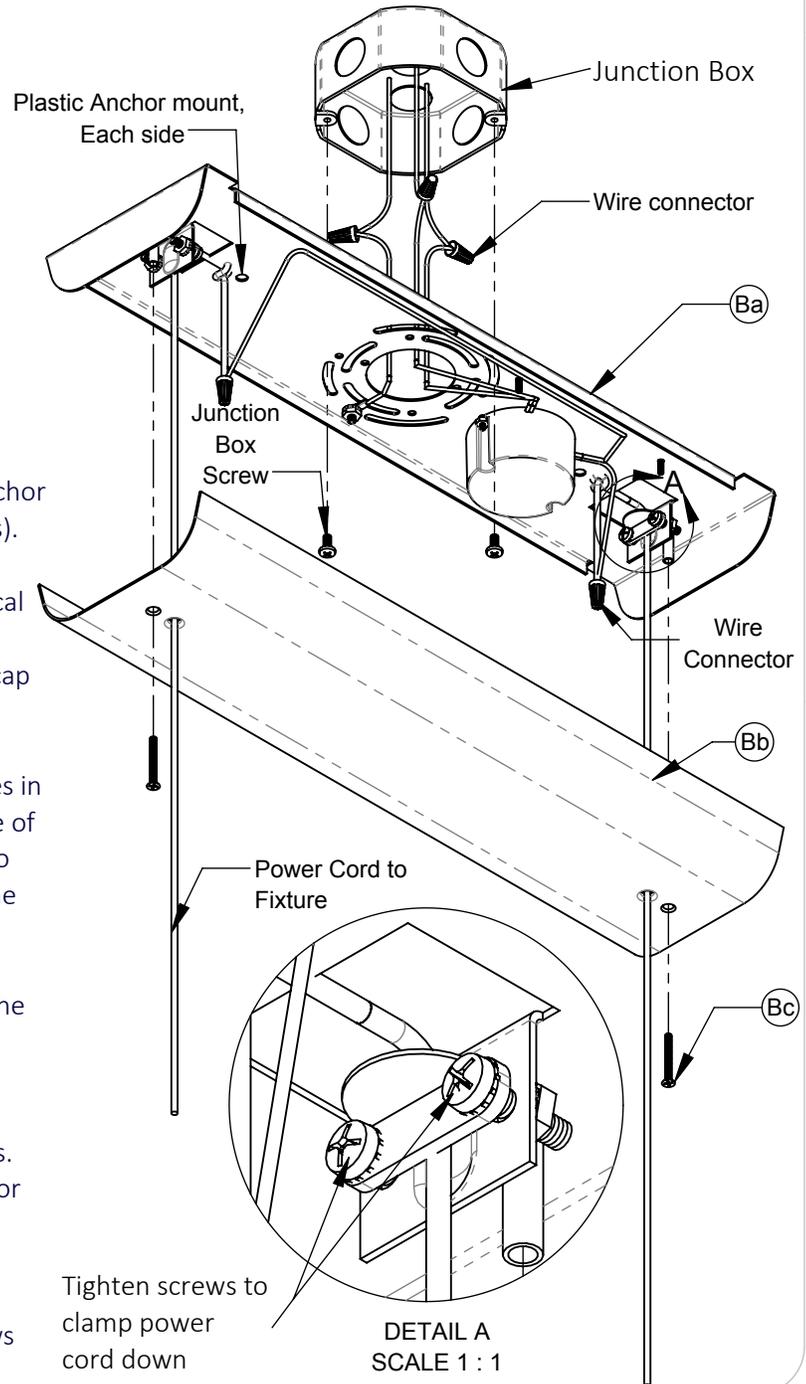

Bb - Cover

Bc - Cover Screws

## SDC option canopy mounting:

Components may vary depending on options ordered.

1. Remove the Cover Screws (Bc) holding onto the Cover (Bb). Save for later.
2. Fasten the Canopy Kit (Ba) to ceiling using the anchor mounting holes (screws/anchors provided by others).
3. Connect the White, Black and Green wires per local and national codes and then push them into the junction box. Connect the 0-10V dimming wires or cap them off.
4. Pull the fixture power cords through the two holes in the cover (Bb) and through the clamps on each side of the canopy kit (Ba). Tighten screws on each clamp to hold power cord down and support the weight of the fixture.
5. Tie an overhand knot on both sides - to prevent the fixture from falling if excess weight is applied. See Sheet 6 for further details.
6. Connect the driver to the two fixture power cords. Each power cord has a single conductor. One cord for (V+) and another for (V-). The power cords will be labeled.
7. Lift the Cover (Bb) in place and reinstall the screws (Bc) that were removed in step 1.
